Current Events-World Geography

Directions: Students will choose to write about 2 current events. **They must choose from the current are of the world we are studying as a class.**

The purpose of doing current events is to promote student awareness of what is taking place around

the world. Articles should be about events that have significant international events. I recommend students look up where this article took place to promote geographical literacy.

For each current event, you must cite your source. Each source must be a credible news source whether using newspaper, internet, or television news.

E. Who was involved? (names and positions)

F. Why did this event occur? (Get help from parents if necessary)
